github.com/jodhman

Fullstack engineer with 8+ years experience building scalable, user-centered web platforms across startups, consultancies, and enterprise orgs.

Specialized in TypeScript, React, and Next.js with deep exposure to design systems, API integration, and rapid prototyping.

Known for high ownership, product intuition, and effective collaboration in greenfield and scaling environments.

Fullstack Developer

VNTRS (Venture Consultancy & Startup Studio)
Stockholm, Sweden

apr 2025–now

Embedded in early-stage and scaleup teams to ship core features and design scalable, maintainable systems.

- **Client: Norban - Proptech**
Built and scaled core product features in a lean team. Led frontend/backend design and architecture using React, Next.js, GraphQL, PostgreSQL, Apollo, Docker, Express

Fullstack Developer

Dynamic Dog (Consultancy)
Stockholm, Sweden

sep 2022–sep 2024

Consulted across multiple digital transformation projects with a focus on fullstack delivery and performance. Created company website while on bench to improve brand presence.

- **Client: Axfood - E-commerce grocery platform**
Built dynamic frameworks for bundled promotions and pricing logic across grocery products. Integrated UX with inventory and pricing APIs.
Stack: TypeScript, React, HTML5, CSS3, EPI CMS
- **Client: TePe Oral Hygiene - Platform Migration**
Led a Next.js migration of legacy architecture with minimal downtime. Boosted SEO, performance, and security through modern frontend design.
Stack: TypeScript, React, Next.js, HTML5, CSS3
- **Client: Univrses - AI & Geospatial Visualization**
Delivered a real-time road infrastructure viewer with interactive maps and AI-integrated data layers. Collaborated with data scientists to visualize insights.
Stack: TypeScript, React, Next.js, Leaflet, Apollo, Storybook
- **Client: Volvo Cars - E-commerce Platform**
Enabled online vehicle purchasing through feature-rich modules for customization, financing, and transactions. Aligned closely with brand, legal, and design teams to meet compliance and UX standards.
Stack: TypeScript, React, Next.js, styled-components, Apollo, Storybook

Frontend Developer

Curb Food
Stockholm, Sweden

oct 2021–aug 2022

- Built kitchen operations and menu management apps for a digital-first restaurant brand. Enabled location-specific menu availability through concept-based performance tracking
- Engineered with TypeScript, React, styled-components, MaterialUI, Storybook

Fullstack Developer **The Many** **feb 2020–oct 2020**
Copenhagen, Denmark

- Built UI libraries and investment dashboard features for Brickshare, enabling retail users to manage real estate portfolios with low friction
- Engineered with TypeScript, React, Storybook, D3, Node.js, Apollo

Frontend Developer **Klarna** **nov 2018–dec 2019**
Stockholm, Sweden

- Contributed to Instant Shopping and Merchant Portal, supporting embedded purchase flows and large-scale mono-repo architecture. Optimized performance in iframe environments and built merchant-facing management tools
- Engineered with TypeScript, React, Redux, styled-components, Cypress, Jest

Consultant Developer **Cybercom, Chas Visual Management** **mar 2017–may 2018**
Stockholm, Sweden

- Delivered frontend solutions across public and private sectors, including self-service portals, and recruitment platforms
- Notable clients: Swedish Tax Enforcement Agency, Oden Network, Folksam.
- Stack: Angular, React, Redux, Java, XML, Bootstrap

Contract-Based Roles

Frontend Developer **Paf - Games Sport Casino** **feb 2021–sep 2021**
Stockholm, Sweden

- Built a modular frontend platform supporting multiple casino brands from a single codebase
- Enabled dynamic layout, theme, and UX switching with shared components for faster rebranding
- Engineered with TypeScript, React, Next.js, Relay, Storybook, Sanity

Frontend Developer **Gustav** **nov 2020–feb 2021**
Stockholm, Sweden

- Enhanced a B2B staffing marketplace for efficient candidate and assignment trading
- Built UI workflows for role matching and collaboration, reducing time-to-fill and friction
- Engineered with Typescript, React, Redux, Storybook

Selected Side Projects

Fullstack Developer **Krub App** **jun 2022–now**
Stockholm, Sweden

- Developed a PWA empowering food content creators to monetize their content in various ways
- Designed creator dashboards with content management and social media aspect for consumers
- Engineered with TypeScript, React, Next.js, NeonDB, Prisma, next-auth

Fullstack Developer **DudeLetsHang** **mar 2025–now**
Stockholm, Sweden

- Built a mobile-first PWA to simplify real-time hangout planning via mutual availability syncing and smart time-slot proposals
- Focused on clarity, touch-first scheduling UX, and minimal social flows
- Engineered with TypeScript, React, Next.js, Tailwind, Firebase, PWA

Fullstack Developer

Västkustbolaget
Stockholm, Sweden

jun 2025–jul 2025

- Built a role-based portal for internal knowledge, streaming, and dynamic content
- Enabled real-time admin tooling with Firebase Auth and Firestore-based access control
- Engineered with TypeScript, React, Next.js, Firebase, Material-UI

Fullstack Developer

LinkReminder
Stockholm, Sweden

mar 2022–nov 2023

- Built a PWA to organize personal contacts with tags, memory notes, and debt history
- Designed intuitive profile retrieval tools for recall and social relationship management
- Engineered with Typescript, HTML5, CSS3, React.js, Next.js, Tailwind, NextUI, Firebase
